

## Technical Service Bulletin

---

**TB7 Affected Models:** 911 Carrera 2/4 (89-) 911 Turbo (91-) 928 (87-)  
**Kit Numbers:** K70022-01 K70023-01 K70021-01 K70021-02 KF783-01  
**Subject:** Porsche 911 and 928 Clutch Releasers

A design change has been made to the guide tube and clutch releaser on the above mentioned applications. The new version clutch releasers can be identified by the inside bore diameter of 32mm and by a polyamide insert that contacts the guide tube. The old version has a 34 mm inside bore diameter. Please note both new and old style releasers must be used with the appropriate guide tube. The new polyamide version requires no guide tube lubrication. The new guide tubes are available from Porsche dealers.
