

Technical Service Bulletin

TB23 **Affected Models:** Isuzu Rodeo 1991-94

Kit Numbers: KF707-01 KF707-02 K70107-01 K70046-01 K1914-05

Subject: BW vs. MUA Transmission Identification

During 1991-1994, the Rodeo was equipped with one of two different transmissions, which will determine the correct clutch kit to be used. To make this determination, the transmission option code can be read from the identification plate mounted on the firewall of the vehicle. The option codes are as follows:

Option Code "RMN" = MUA Transmission

Option Code "MM5" = BW Transmission
